

OptiSpec® DE2503

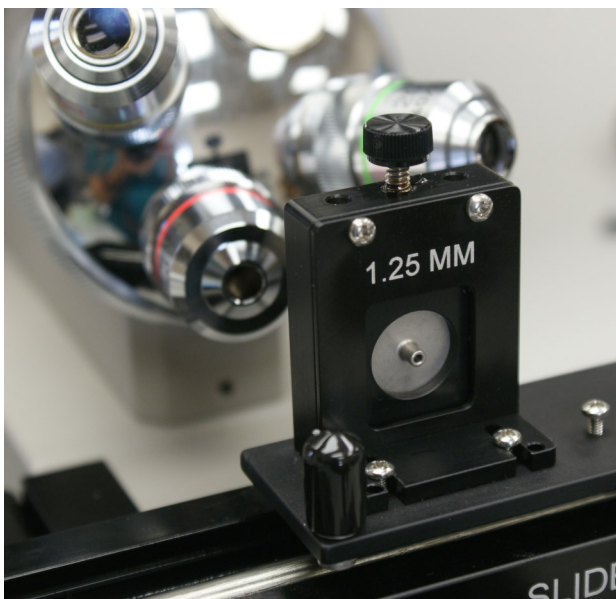

Fiber Optic Microscope

Our Domaille Engineering OptiSpec® DE2503 video microscope is designed for large and small fiber optic cable assembly companies. The DE2503 accommodates bare fiber inspection as well as all of the standard connectors including the entire MT series of multi-fiber connectors. Blue LED illumination control eliminates previous industry standard light source issues and improves contrast on minor scratches.

Monitor and adapters sold separately

Benefits at a Glance

- OptiSpec® blue LED illumination
- High Resolution Video
- Quadruple turret nosepiece which allows for quick change of magnification
- Video magnification 200x, 425x and 875x (1720x optional)
