

XYZ Manual 3-Axis Stage

SUPERIOR PERFORMANCE

Imagine a positioning system so stable and easy to adjust that singlemode optical fiber alignment is as simple as tuning a radio! No need to let go of the micrometers while adjusting - the I3000 is *extremely* touch insensitive. And with the patented ergonomic inline design, all the micrometers are easily accessible on one side - just rest your hand comfortably on the table and enjoy the ease and efficiency of quickly aligning any type of fiber. No fiber alignment challenge is too difficult - even 1-2 micron core lensed fibers can easily be aligned. This is possible because of the radical departure from conventional design.

FEATURES

- Patented Inline actuators provide ease of access.
- Patented 25x Ratio Drive™ system affords superior resolution for far less cost.
- Small footprint allows multiple unit workstations.
- Onboard controller for actuators avoids high cost of separate motion controllers.
- Damped exterior shell design provides superior vibration and touch insensitivity.
- Lightweight aluminum construction allows system to be moved easily by other motion equipment.
- High mechanical stiffness affords rugged and stable base system.
- Patented linear dual flexure Z offers frictionless repeatable straight travel.

INNOVATION

The Luminos I3000 benefits from our patented Ratio Drive™ while all other stages are direct-drive. A standard micrometer, which has about 1/3 the backlash of a differential micrometer, is further improved by the 25x Ratio Drive™ resulting in a backlash of only 20 nanometers and an incredible single-sided resolution of just 1 nanometer!

The I3000 is extremely vibration and temperature insensitive. In an ordinary lab *without* an optical table, normal temperature fluctuations result in only 0.03 dB variation with *no* drift in a typical singlemode alignment for over a month.

ACCESSORIES

With accessories ranging from fiber array holders to contact sensors, Luminos can get you out-fitted and up-and-running quickly on your applications

AUTOMATION

With this advanced design, upgrading to automation is easy and inexpensive. Our standard, low cost stepper motor option provides the I3000 with a resolution of 4 nanometers and a 1/2 millimeter of travel on the X and Y axes. An additional 2 millimeters of manual travel is still available using the coarse adjustments. If you require more travel to be available using the actuator, consider the I3005. The Z axis provides a larger 1/2 inch (12.5mm) travel on the focal axis and a resolution of 100 nanometers. Using the internal Linear Motors option, the I3000 is capable of 1/2 nanometer movements on the X and Y axes superimposed on the stepper motor and coarse adjustment travel.

ORDERING INFORMATION

Part #	Description
P3-M-M-M-1-N-H-N	I3000: 3-Axis Positioner, Z-Axis Actuator: Manual Imperial Micrometer, X-Axis Actuator: Manual Micrometer, Y-Axis Actuator: Manual Micrometer, XY Coarse Adjust: 40 pitch set screw, XY Linear Motors: None, Mounting Axis: Horizontal, Side Damper: None
P3A-M-M-M-H-N	I3005: 3-Axis Positioner (5x), Z-Axis Actuator: Manual Imperial Micrometer, X-Axis Actuator: Manual Micrometer, Y-Axis Actuator: Manual Micrometer, Mounting Axis: Horizontal, Side Damper: None
