

KS-3 SHEARS

Angle-Head Cutting Shears MC01-7100

Multi-purpose cutting shears to cut Kevlar fibers, a small-size conductor wire cutting notch as well as terminal crimps.

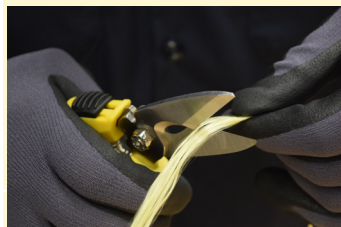

Ripley's KS-3 angle-head cutting shears are the ultimate technician's tool, with ergonomic design and micro-serrated blades for clean cuts on Kevlar and other fibers in cable preparation.

Today's technicians tackle multiple jobs and need their tools to keep up. Ripley's Miller Series KS-3 is a multi-purpose cutting shear that cuts delicate fibers with micro-serrated blades, a small-gauge aluminum or copper wire cutting notch, non-insulated terminal crimping teeth and a tether point handle.

Features

- Custom-designed ergonomic body to avoid pinch points
- Crimping teeth for 10-22 AWG non-insulated terminals
- Cuts copper or aluminum wire up to 4 AWG
- Metal cutting area offset from fiber cutting blades to maintain blades for precision fiber cutting
- Round cutting notch for small-gauge copper or aluminum
- Sliding lock for safety
- Tether attachment point at base of handle

Part #	Item description	Length	Weight
MC01-7100	Multi-Purpose Angled Shears	9.25" (235 mm)	4.8 oz (136g)

Micro-serrated blades for precision cuts on fine, tough fibers

Cuts up to 4 AWG copper or aluminum wire in metal cutting blade

Round cutting notch for small-gauge copper or aluminum

Ergonomic grip and rounded edges for repeatable cuts with no pinch points

A proud member of the Hubbell family.
