Always use OSHA/ANSI/CE or other industry approved eye protection when using tools. This tool is not to be used for purposes other than intended. Read carefully and understand instructions before using this tool.

WARRANTY: RIPLEY warrants its products against defective materials and workmanship for a period of two years from date of shipment from the RIPLEY factory provided the product is utilized in accordance with instructions and specified ratings.

Product Overview

The **MILLER**® MC04-7000 tool is an insertion/extraction tool for Senko® CS® and SN® connectorized cables in a high density enterprise or data center application. The jaws are specially sized and formed to securely install or remove connections to transceivers with no interference to adjacent connectors.

Product Features

- Narrow tool form for high density transceiver interface
- Keyed tip of tool will reliably grasp the connectors
- Built in jaw relief for connector boot clearance
- Angled handles for ease of use.

Operating Instructions

1. Unlatch the tool so it fully opens.
2. Gently squeeze the back of the CS® or SN® connector with the MC04 jaws.
3. Insert or extract the cable assembly from the port as desired. The connector will audibly click when correctly inserted.
