

	PH55-PL-48DHP	PH55-PL-48DFX
LC Duplex Connectors	△ If the ferrules are not parallel, it will affect the independent load → Radius varies	○ Not affected by Duplex.
In case of heavy and thick cable	△ Cable bending and pushing/pulling forces affect the independent load → Radius varies	○ Not affected by cables.
Control of Radius	△ Adjustment can be done only by the hardness of the polishing pads. → Fine adjustment is not possible.	○ Can be adjusted by both the hardness of the polishing pad and the polishing pressure. → Fine adjustment is possible.
Effect of dirt on the polishing holder	△ Dirt in the ferrule insertion hole affects the independent load. → Necessary to keep the insertion hole clean at all times.	○ Less susceptible to dirt than independent pressure holders.
Connector insertion	○ Easy	△ You need to push the connector in to set it.
Re-polishing	○ Easy to re-polish	△ If the ferrule height varies from one ferrule to the others, it will affect the radius.

Distributor in China:
