

【 Announcement 】 Data Pixel #20260224 FW: Upgrade of New Camera and BLINK Software (Effective March 1, 2026)

For your information, effective March 1, our Daffi and Daisi interferometer ranges, as well as the Dscope MT microscope range, may be delivered equipped with new camera models. Consequently, these systems will require Blink software version v2026.1 or later for proper operation.

Please note that Blink v2026.1 remains fully compatible with all previously delivered Data-Pixel equipment, ensuring seamless continuity for existing installations.

Systems delivered with the new cameras will be clearly identified by a label on the instrument housing, indicating the minimum required Blink version. Should you have any questions or require assistance with the software update, our support team remains at your disposal.
