

Notice Regarding Changes to Polishing Machine Manuals

This is to inform you of a change regarding the printed manuals previously included in the packaging of Seikoh Giken polishing machines. Effective from the dates specified below, the physical manual will be replaced by a "Safety Information" sheet.

Users are requested to scan the QR code or visit the URL printed on this sheet to access and download the electronic version of the manual online. Please find the specific details of this change below:

NOTE: For the SFP-560 series, a Chinese version of the manual will also be available for download.

1. Changes to Included Documentation

SFP-560A Series: In addition to the "Safety Information" sheet, a "Safety Precautions" document regarding the automatic clamping function will continue to be provided.

Other Models: Only the "Safety Information" sheet will be included.

Important Notes:

If a customer explicitly requests a physical manual (e.g., for CE certification compliance), our company will print and send it upon request.

When accessing the manual via the QR code, a User ID and Password are generally not required. However, depending on browser specifications, a prompt may occasionally appear. In such cases, please follow the on-screen instructions.

2. QR Code Labels on Machine Bodies

QR code labels will also be affixed to the polishing machine bodies at the

following locations:

Large Models (SFP-560A Series, SFP-550E4, SFP-550C): Located above the warning label on the front right side of the operation panel.

Small Models (SFP-70D Series, SFP-70D2 Series): Located below the Serial Label on the rear side of the operation panel.

Note: Coinciding with this change, the location of the Serial Label itself will move from the bottom of the unit to the rear panel.

3. Effective Dates

SFP-560A Series & SFP-70D2 Series: Applicable to shipments made after April 27, 2026.

Other Models: Expected to be applicable from mid-May 2026.

Thank you.
