

Notice: Color Change of Anodized Flanges for Data-Pixel (France) Daisi-MT/Daffi-MT Interferometers

Dear Valued Partners,

We are writing to inform you of a change regarding the MT flanges used in Daisi-MT and Daffi-MT interferometers. The shade of the "gray" anodized finish will be lighter than the previous version.

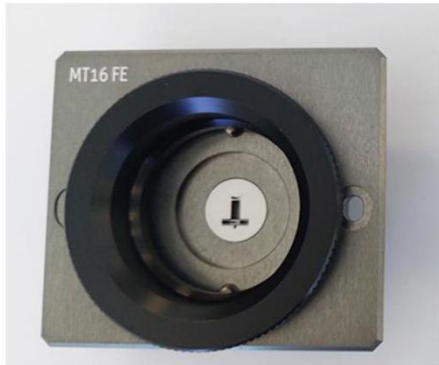

Reason for Change: This adjustment is being made to standardize the anodizing process across all MT flanges, ensuring color consistency between the Daisi-MT/Daffi-MT and the DPX360 models. Moving forward, all new MT flanges will uniformly adopt the DPX360 color standard.

Please be advised that shipments commencing in April 2026 may contain a mix of both the new (lighter) and old (darker) flange finishes during the transition period.

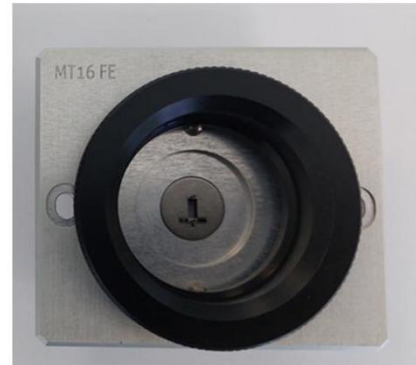

We appreciate your understanding and continued support.

Best regards,

BEFORE:
