

New Product Announcement

Date: October 14, 2026
Attention: Tempo Sales and Distribution Partners
Subject: EML150 Electronic Marker Locator
From: Alejandro Aste-Nieto, Product Manager, Location and Markers

Introducing the EML150 Electronic Marker Locator

The EML150 is Tempo's new professional-grade electronic marker locator. It detects all 9 industry-standard marker frequencies and connects to Tempo's free Locator Link mobile app, so technicians can find buried markers and build a digital record of where they found them.

The EML150's Pin feature captures a marker's GPS coordinates and stores the record on the locator, which syncs to Locator Link via Bluetooth. In the app, users can view records on a map, add photos and field notes, and export to KMZ, CSV, or JSON for GIS and asset-management systems. Locator Link also connects to external GNSS receivers for higher-accuracy location data.

EML150 KEY BENEFITS

CAPABLE

- Locates all 9 industry-standard marker frequencies
- Scan Mode searches all enabled marker types at once and identifies the marker type detected
- "Pin" feature records marker GPS coordinates when connected to Locator Link
- Easy-to-read color LCD screen with intuitive button and softkey layout

Tel: +86-755-8665-5448; +86-755-8665-5579; Email: info@pztest.com Website: www.pztest.com

- Syncs with Tempo's Locator Link mobile app (iOS and Android) via Bluetooth
- Locator Link lets users view records in List or Map View, add photos and notes, and export to KMZ, CSV, or JSON
- Connects to external GNSS receivers through Locator Link for high-accuracy location data
- Software updates delivered through the Locator Link app

CONVENIENT

- Replaceable, rechargeable battery with 10-hour typical battery life
- USB-C charger included for convenient recharging
- Unit stands upright on its own when placed on the ground
